KIT AERO

P/N VB23712T

BORESCOPE KIT (VISIO-BOX3.7/1200)

Categories: Testing, measurement and maintenance tools, benches, Endoscope

PRODUCT DESCRIPTION

The Borescope kit is a desktop solution for the support of probes. It allows the inspection of Main Gear Box, Tail Gear Box, Intermediate Gear Box, Engine and Horizontal Stabiliser. This system works with a probe with a high-precision optics. This sensor is equipped with a high-performance CCD sensor to provide video and photos to perfectly visualize inspection details. Its outputs enable it to be connected to any Visio P2 probe, regardless of its length, diameter or optics.

TECHNICAL INFORMATION

APPLICABILITY	Dauphin, H225M, Super Puma, AS332, AS365, AS532, AS565, H175, H225
Caractéristiques principales	– Probe diameter: 3,7 mm – Probe length: 1200 mm – Articulated head: 4×90
ATA	60-00
