SHORT TOW BAR H160

Categories: Towing, mooring and immobilization tools, Tow bars

PRODUCT DESCRIPTION

The Tow-bar is a rigid stowage device that attaches to the nose gear and tractor to move the helicopter from point A to point B.

Installation feasible by an operator on flat ground and with good weather conditions. 2 operators are needed for an installation in bad weather or inclined ground. The 2nd operator should be used to guide the operator installing the bar.

Additional spare parts FUSE-SET-160 (kit of 10 torsions and 10 tractions) can be purchased if necessary.
