STANDARD TOW BAR H160

Catégories : Tow bars, Towing, mooring and immobilization tools

PRODUCT DESCRIPTION

The Standard Tow-Bar is a rigid hitch that attaches to both the NLG and the tractor for the purpose of moving the helicopter from point A to point B.

Installation feasible by an operator on flat ground and with good weather conditions. 2 operators are needed for an installation in bad weather or inclined ground. The 2nd operator should be used to guide the operator installing the bar.

Additional spare parts FUSE-SET-160 (kit of 10 torsions and 10 tractions) can be purchased if necessary.
