KIT AERO

**P/N** AVX-10K-CNS-AH

# FLIGHT LINE TEST SET

**Catégories :** Electrical Test Case, Testing, measurement and maintenance tools, benches

## PRODUCT DESCRIPTION

Communication, Navigation and Surveillance package

Direct replacement of the IFR4000 & IFR6000 (2-in-1)

The AVX-10K is a comprehensive flight line test solution providing today's Avionics Technician with an easy-to-use instrument for many maintenance needs. From a quick airborne system auto-test to an indepth troubleshooting tool, testing can conveniently be done around the aircraft or in the cockpit from the touchscreen display or using your mobile device.

Benefits :

- Time saving ease of operation
- Easily updated with future applications
- Test in and around the aircraft from your mobile device
- Recall saved test sequences for future use
- Provides accurate positional data for ADS-B testing
